1. The Agricultural Inchinery Plant in Kharkov (Zavod Selsko-Khoziastvenikh Machin) was also referred to as the Harmer and Sickle Plant (Serp 1 Molot).	
Prior to the Running Description and Market and Sierie Plant (Serp 1 Majot)	
It was located such to the country as the second the zaved Gelferich-Sage	
It was under the to the	
It was under the justicalistion of the reopie's Commissariat of Heavy	
Industry (Eurodnii Homensouriat Chezoli Promishlenisti), Agricultural Machinery Section (Otdel Scholo-Mooriastvenik Hachin).	
2. It made all kinds of a wighthank a software with the continuous states ()	:
dises; Howers; sinders; recovers; and threehouse (plusi); harrows (boroni);	:
2. It made all kinds of a relational machinery: plows (plugi); harrows (boroni); discs; nowers; sinders: respect; and threshers (molotilki). In 1938, the plant	:
McCormick combines, with antonatic grain loaders, experimentally A in	:
McCormick combine was whilized as a model and the plant actually had presented	:
McCormick combines, with automatic grain loaders, experimentally. A US of one. This factory had on extremely large production as it served all the southern USSR. Those was a coutlern than the plant actually had possession southern USSR. Those was a coutlern than the plant actually had possession southern USSR.	:
McCormick combines, with automatic grain loaders, experimentally. A US of one. This factory had an embeddand the plant actually had possession southern USSR. There were only one or two other plants like it in the USSR.	:
